

Harsh Raj

Gurugram, Haryana

harsh14raj1111@gmail.com — +91 8102309095 — [LinkedIn](#) — [GitHub](#) — [Portfolio](#)

Education

K.R. Mangalam University
B.Tech in Computer Science (AI/ML)

2023 – 2027
CGPA: 8.84(5th sem)

Skills

AI/ML: NLP, LLMs, Deep Learning, TensorFlow, PyTorch, Computer Vision, OpenCV, Hugging Face/Transformers

Programming Languages: Python, Java, JavaScript, SQL, PHP

Web & Backend: HTML, CSS, React, Next.js, Node.js, FastAPI, REST APIs, WebSockets

Frameworks & Libraries: Tailwind CSS, Flutter, Pandas, NumPy

Systems & Robotics: IoT, Robotics, Raspberry Pi, Arduino, Embedded Systems, Serial Communication

Tools & Platforms: Git, Docker, Firebase, Vercel, Railway, Supabase

Core Concepts: Data Structures & Algorithms, System Design, Real-time Systems, Model Deployment

Soft Skills: Problem Solving, Team Leadership, Collaboration, Communication, Critical Thinking, Adaptability, Project Management, Time Management

Projects

Independent Digital Real Estate Transaction System (BLF Developers) [live link](#) 2026
React, FastAPI, DevOps, PostgreSQL [GitHub Repository](#)

- Built platform for managing brokers, property inventory, and real estate transactions.

ProBills – Smart Restaurant Billing & POS System [live link](#) 2026

React, Next.js, Firebase

- Developed POS platform with digital billing, menu management, and order tracking.

Grid Deviation Prediction ML Model 2025

Python, TensorFlow, Scikit-learn

- Built ML model achieving **99.6% accuracy** using **22+ engineered features**.

ADA – Advanced Dynamic Assistant 2025

Python, TensorFlow, Scikit-learn, open-cv, livekit,

- Developed an AI assistant uniting speech recognition, NLP, and computer vision with real-time voice interaction using Python and OpenCV.

Autonomous Agriculture Monitoring Rover 2024

Raspberry Pi, Arduino, LiDAR, IoT Sensors

- Developed sensor-based rover for environmental monitoring and field data collection.
- Built real-time dashboard with camera streaming and remote control interface.

Experience

Conversational AI Engineer — Avosys Technologies Jun 2025 – Jul 2025

- Built multilingual conversational AI pipelines using NLP and LLM architectures.
- Led team of 5 engineers developing scalable voice AI solutions.

NLP Engineer — Indian Institute of Technology Mandi Jun 2024 – Jul 2024

- Developed bilingual voice cloning and text-to-speech systems (Hindi & English).
- Collaborated with researchers on speech synthesis models.

Web Developer — Mirai Info Serve LLP Aug -Sep 2024

- Freelanced - Designed and implemented modern frontend UI for production web application.

Head Coordinator — COERA Robotics Club 2024 – 2025

- Mentored development of 20+ robotics and automation projects.
- Organized large-scale technical events with 1000+ participants.

Achievements

- **DeepData Hack 2.0 — 1st Prize:** Grid deviation ML prediction system.
- **National Technology Day — 1st Prize:** AI solution for UN SDG challenge.
- **Geekathon — 1st Prize:** AI-powered financial management platform.
- **HackKRMU 3.0 — 2nd Prize:** Drone automation and safety solution.
- **Best Project Award 2025 (2nd Prize):** AI-powered assistant with real-time voice interaction.
